

# Planned Parenthood sells baby parts.

This summer, Planned Parenthood officials were caught on tape by undercover investigators negotiating prices for the body parts of babies aborted at their centers.

Planned Parenthood denies that the living child in the womb has any value. But once that child is dead, its body parts are priced out, harvested and sold to the highest bidder.

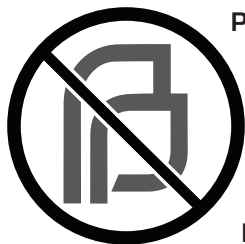

Profiting from aborted fetal tissue is illegal. Planned Parenthood claims that any fees they receive merely cover their actual costs for storage and transportation. Yet, the officials in these undercover videos baldly attempt to maximize their profits for providing fetal livers, hearts and brains. One even joked, "I want a Lamborghini!"

Even more shocking to many viewers is the cold, callous manner in which Planned Parenthood's doctors discuss the process of harvesting fetal body parts.

While munching on a salad and sipping wine, one doctor bragged: "We've been very good at getting heart, lung, liver," and explained how the abortion procedure is modified depending on what body parts are desired: "I'm gonna basically crush below, I'm gonna crush above, and I'm gonna see if I can get it all intact."

Planned Parenthood is already the nation's largest abortion chain. Even as abortion rates drop, Planned Parenthood's abortion business is increasing. They perform over 327,000 abortions every year, and half their clinic income is from abortion. Now they're trying to squeeze even more profit out of these abortions.

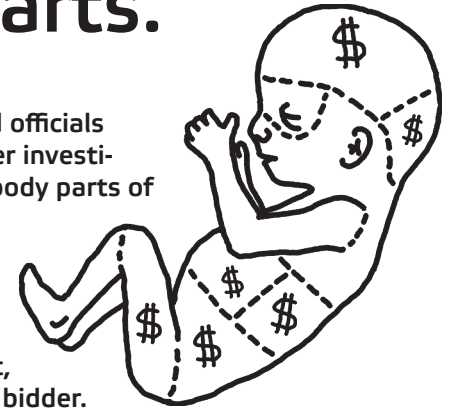

Planned Parenthood receives more than half a billion dollars in state and federal grants every year. Contact your elected officials and demand they investigate Planned Parenthood and stop all taxpayer funding of this corrupt organization.
